The second BIM Conference in Hong Kong gathers building professionals to discuss industry trends, case studies and how to work closely together to unlock the full potential of BIM applications.

Why attend?

Latest government policies

The government's commitment to the "Construction 2.0" strategy is evident and BIM technologies are adopted in major government capital works projects. Learn what the wider effects could be for the industry.

Application of BIM

Learning how developers and construction companies use BIM successfully, while also learning about the latest innovations in site/construction management across luxury housing, office building complex and public housing projects.

Latest developments in digitisation and building technologies intersections

Understanding the solutions available to drive efficiency and optimise your projects. Discover new offerings and how 5D BIM, UAV, GIS, 3D-mapping are coming together.

Building life-cycle management efficiency

How BIM helps plan, track and improve building life-cycle management for better quantifiable outcomes and building performances.
