Determinants for Sharing Knowledge in FM Phase : PFI Projects

19th September 2019

2.00 pm

Abstract

Facilities management (FM) of private finance initiative (PFI) projects consists of complex tasks and activities. In current practices, there are numerous problems highlighted by many researchers. The fundamental problems are typically related to the overall performance of FM-PFI projects towards the successful accomplishment of the key performance indicator and economic value for money. Meanwhile, the lack of knowledge management (KM) initiatives is mainly associated to these problems. Therefore, by means of accepting the valuable contribution of Knowledge Sharing (KS) towards organisational performance, this paper will be discussed on the determinant factors for KS specifically in FM-PFI projects. The FM-PFI Knowledge Sharing (KS) model will be presented and explained in specifics. As consequences, the overall performance of FM-PFI projects can be improved to gains organisation performance and value for money.
